

Mission & Vision

WORWYN exists to make hiring human again. Résumés don't show personality — they hide it. We replace filters and bullet points with presence, energy, and first impressions, giving every candidate the chance to be seen and every employer the ability to feel the fit before the first interview.

Our vision is to become the world's first personality-first hiring marketplace — a simple, human, video-first experience where careers begin with a real connection, not a document. A world where hiring feels like meeting someone, and where mutual chemistry — not keyword matching — decides who gets the opportunity.

Employer revenue — the primary engine. Employers pay per candidate unlock and per Mutual Rise™ match, or subscribe to unlimited monthly hiring plans. Additional revenue comes from featured job slots and prioritized placement of candidate intro videos.

Candidate revenue — premium upgrades. Candidates can boost their profile, record multiple Vibe Videos™, see who Rised them, and purchase premium visibility.

The marketplace structure carries no inventory or fulfillment costs, producing strong margins and near-infinite scalability: every new candidate video increases value for employers, and every new employer increases value for candidates — a self-reinforcing network effect across the \$200B+ U.S. hiring market.
