

# Worwyn — AI Brand Assistant Setup

One-time setup, about 5 minutes. This PDF mirrors Setup\_Instructions.md in the worwyn-brand-system repository.

## What you will upload

### Knowledge files (7):

1. 01\_BRAND\_FOUNDATION/Brandbook.pdf
2. 02\_AI\_GUIDELINES/AI\_Brand\_Instructions.md
3. 02\_AI\_GUIDELINES/Visual\_Language.md
4. 02\_AI\_GUIDELINES/Tone\_of\_Voice.md
5. 02\_AI\_GUIDELINES/Do\_Dont.md
6. 03\_CONTENT\_SYSTEM/Instagram\_Posts.md / LinkedIn\_Posts.md / Presentations.md (the ones you need)

Instructions file: 04\_SETUP/Master\_Prompt.txt — you will paste its text, not upload it.

Tip: on the GitHub repo page click the green "Code" button, then "Download ZIP" to get everything at once.

## Option A — ChatGPT (Projects)

1. Go to chatgpt.com, open Projects in the sidebar, click "New project", name it "Worwyn Brand".
2. Open the project, go to Project files, click "Add files", upload the 7 knowledge files.
3. Open Instructions in the project settings, paste the full text of Master\_Prompt.txt, save.
4. Start a new chat inside the project. It should greet you with "Worwyn Brand Assistant ready."

Alternative: create a Custom GPT (Explore GPTs > Create), paste the master prompt into Instructions and upload the same files into Knowledge — useful to share with the team.

## Option B — Claude (Projects)

1. Go to claude.ai, open Projects in the sidebar, click "Create project", name it "Worwyn Brand".
2. Open Project knowledge, click "Add content", upload the 7 knowledge files.
3. Click "Set custom instructions", paste the full text of Master\_Prompt.txt, save.
4. Start a new chat in the project. It should greet you with "Worwyn Brand Assistant ready."

## Example prompts

- Write Monday's Instagram statement post about why resumes hide personality. Give me the visual concept + caption + hashtags + alt text.
- Create a 6-slide tip carousel: "5 Vibe Video mistakes". Copy for every slide.
- Write a LinkedIn perspective post for employers about feeling the fit before the first interview.
- Draft the content of a 10-slide intro deck following the deck skeleton.
- Give me a Midjourney prompt for a celebration image for a Mutual Rise announcement.

## Keeping it on-brand

- If output drifts off-brand, reply: "Check this against Do\_Dont.md and fix it."
- When brand files change in the repo, re-upload the changed files to the project (delete the old copy first).
- The assistant is instructed to ask rather than invent facts — answer its questions, don't let it guess.

## Troubleshooting

- Doesn't greet / ignores rules — instructions weren't saved; re-paste Master\_Prompt.txt into the project instructions.
- Wrong colors or fonts — say "follow AI\_Brand\_Instructions.md section 2"; check the files are actually uploaded.
- Generic corporate tone — say "rewrite per Tone\_of\_Voice.md voice traits table".
- Can't read the brand book — upload Brandbook.pdf (the merged file), not the 22 single pages.
